Re: DEQ Review-MMGL Doane Lake SCM Construction Completion Report.  
ECSI #395

Dear Mr. Novack:

The Department of Environmental Quality (DEQ) has reviewed the May, 2015 Doane Lake SCM Construction Completion Report, prepared for MMGL Corp. (formerly Schnitzer Investment Corporation) by Bridgewater Group, Inc.

The report presents construction documentation for the cleanup action outlined in the May 7, 2014 DEQ approved work plan which consists of moving a limited volume of waste material onsite, capping waste material areas with significant contamination, and grading the site to direct stormwater to the existing onsite pond.

The revised report incorporated DEQ's April 3, 2015 comments. DEQ approves the report. Thank you for the submittal.

### Next Steps

An overview of DEQ's anticipated next steps is presented below:

1. MMGL to submit 1<sup>st</sup> annual cap inspection report including SCM performance monitoring results. (DEQ notes this was submitted to DEQ on September 24, 2015)
2. Pending successful demonstration of performance monitoring DEQ to draft final Source Control Decision documenting completion of the source control measure.
3. EPA approval of the final Source Control Decision.
4. Recording of the EES with Multnomah County.
5. Annual performance monitoring and reporting per the DEQ approved Soil and Cap Management Plan.

If you have any questions for DEQ regarding this matter, please contact me at 503-229-5354.
